PROFILE

Full-Stack Developer specializing in React, Node.js, and Tailwind CSS, with hands-on experience architecting and shipping a production e-commerce platform from the ground up. Comfortable across the stack — from REST API design and database integration to building responsive, high-conversion UIs. Computer Science undergraduate at the University of Ilorin, actively expanding into Docker, CI/CD, and cloud deployment.

EXPERIENCE

Founder & Sole Developer — Swiftly

March 2026 – Present | Ilorin, Nigeria | [swiftlyweb.shop](#)

- Independently designed, built, and deployed a full-stack e-commerce and delivery platform serving the University of Ilorin campus community, handling the entire product lifecycle from concept to production.
- Engineered the frontend with React and Tailwind CSS, and the backend with Node.js, Express, and REST APIs, including product catalog, cart, and order management.
- Integrated WhatsApp-based ordering to reduce checkout friction for a campus audience, and managed end-to-end deployment on Vercel.
- Owned the full product lifecycle solo — architecture, database design, UI/UX, deployment, and ongoing iteration — with no team or external support.

PROJECTS

Seeker — Web3 & Remote Job Discovery Platform

- React-based platform for discovering Web3 and remote job opportunities, with fast search/filtering.

Agro-Help — Agricultural Support Platform

- Solo-built agri-support platform for Nigerian farmers: AI farm advisor (Google Gemini API), weekly tips, labor marketplace, and solar energy calculator. Stack: React, Tailwind CSS, Node.js/Express.

Personal Portfolio

- Designed and built a personal portfolio site showcasing projects, skills, and technical writing.

TECHNICAL SKILLS
